

## WHAT'S NEW IN RADAROPUS 2.1.12

*Updated including new implementations and improvements of version 2.1.12*

RadarOpus **2.1.12** will be delivered as a **Live Update** (onto version 2.1.11).

This version is an intermediate release and offers increased stability and performance improvements including the following:

- Some improvements to the **Content Updater**
- Expands the catalogues to **8.022 remedies** and **2.338 author (references)**
- Ability to access **Danish** and **Russian** documents as well (now 12 languages)

### REPERTORY AND MATERIA MEDICA: NEW IMPLEMENTATIONS

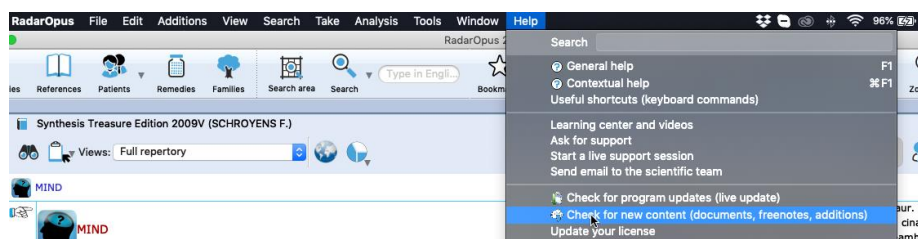

- An SQL file will automatically update the remedy catalog with 232 new remedies, expanding it from 7.790 (RadarOpus 2.1.11) to **8.022 single remedies** and update the author (references) catalog with 48 new references, expanding it to **2.338 references**

The new remedies were added to accommodate the following authors:

- Frans Vermeulen's Vista Vintage and Source and Substance (Harrogate aqua, lac camelum bactrianum, etc.)
- Anne Vervarcke's Vital approach (webspiders, gastropoda, etc.)
- Farokh Master's new remedies (imatinib, hyaluronicum acidum, etc.)
- Jan Scholten's Wonderful Plants (serratula tinctoria, sinningia allgophylla, etc.)
- Luke Norland's new remedies (sarcodes, matridonals, etc.)
- Indexes in **Danish** and **Russian** have been added, allowing to release documents in Danish and Russian. RadarOpus users can now read and search in 12 languages (Chinese, Danish, Dutch, English, French, German, Italian, Japanese, Portuguese, Russian, Spanish and Turkish)

### NEW DOCUMENTS AVAILABLE FOR RADAROPUS USERS

As documents (= content) are no longer released WITH a program update, they are not listed here anymore. They will be offered through the Content Updater (available in RadarOpus under "Help – Check for new content".)

Here are some relevant remarks nonetheless:

- KENT J.: Lectures on Homeopathic Materia Medica [4th Ed.] (k2): a new version including many corrections and adding missing text.
- RATHMER D.: Rathmers Repertorium der besonderen Geist und Gemüts Rubriken in der Homöopathie (rmd1.de): "information notes" have been added to the symptoms
- SHERR J.: Mental Qualities (srj11-2019) has been recompiled into a multilingual version. This means that there will no longer be separate, one-language versions. There is only one identical version with different languages, like Synthesis (Dutch, English, French, German, Italian, Portuguese, Spanish).
- TUMINELLO P. (tmo4): the title of book tmo4 has been changed from "Twelve Jewels" to "Gemstone Provings" because it contains 13 provings
- SHUKLA C.: 2 provings, cns7 (Corvus splendens) and cns8 (Hippocampus kuda), have been deleted from RadarOpus because they also appear in the complete book cns9 (The Quintessence of Homeopathic Remedies).

## REPERTORY AND MATERIA MEDICA: IMPROVEMENTS

- Improvements to the **Content Updater** window:
  - After RadarOpus has finished updating the database(s), there is no more crash when the user clicks "Yes"
  - If the user downloads an SQL file corresponding to a document the user has bought, the execution now starts automatically, also when the user downloads that document again
  - In the Content Updater window, if one selects the option to see all documents, that window does not become too large any more. Now, all users can see the Download button.
  - Default option now is to show "Only new documents"
- A script fixes the remedy names that had a blank space at the end of the full name or at the end of the abbreviation. The layout issue is now fixed.
- The Update installer has been optimized so less windows and less clicks are needed to complete the installation

## PATIENT FILE (WINCHIP): IMPROVEMENTS

- Fixed an error when inserting a *character* in the "ZIP" field
- Fixed an error happening when inserting an apostrophe in some fields
- Fixed an error in the "Payment mode" field of the Bill window happening when inserting a value already existing in its picklist
