

PATIENT FILE IMPROVEMENTS TO PRESCRIPTIONS & PATHOLOGIES

- New tabs have been created for adding prescriptions and pathologies, making the layout more clear and comprehensive, particularly for long-standing patients for whom there have been many prescriptions.

- Click on the Remedy bottle icon to open the Prescriptions Tab
- It is much easier to see the overview of your prescribing for a patient with the prescriptions moved to a dedicated tab.
 - Fill in all the fields, then click on the ADD button

Add new prescription

Prescription Potency Scale

Posology Laboratory Notes

Add

- - *Expert tip* – You can now click the down arrow to open the pick-list in any field
 - A new Notes field was added for specifying details such as *number of drops, how many succussions, or other instructions.*

- Click on the MEDICAL icon to open the Pathologies tab

- Functionality is similar to adding a prescription – fill in all the fields then click the ADD button

Add a pathology
