KENT MM

Remedy: ign

(Lectures on Homeopathic Materia Medica [4th Ed.])

- Ignatia is frequently required and is especially suited to sensitive, delicate women and children; to hysterical women.

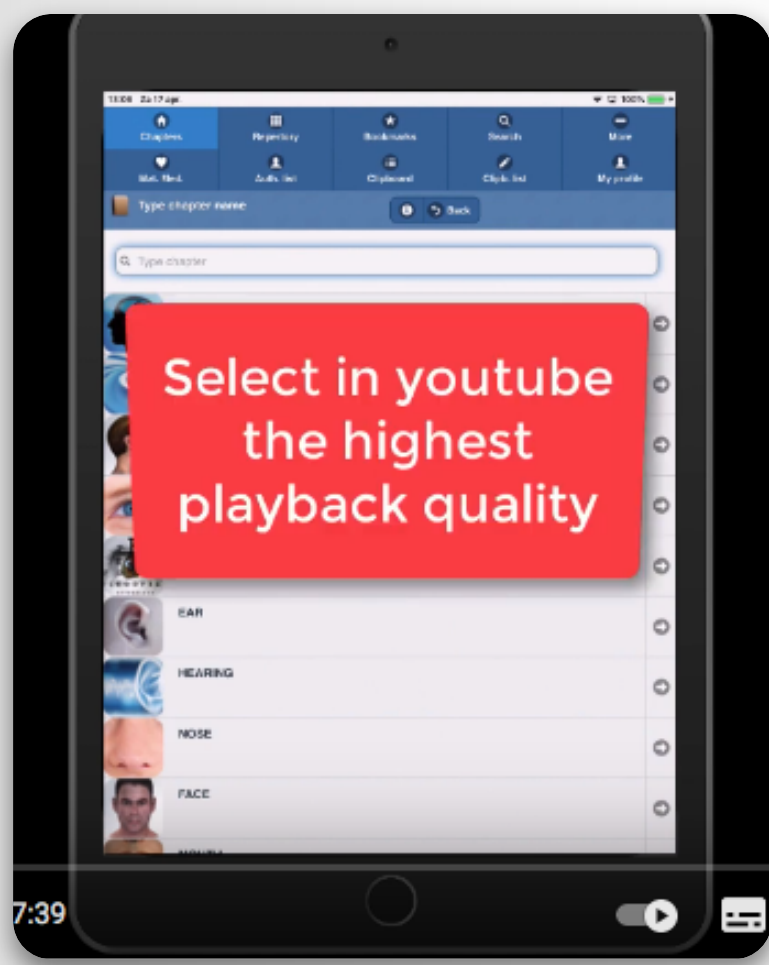

- You will not cure the natural hysterics with *Ign.*, but you will cure those gentle, sensitive, fine fibred, refined, highly educated, overwrought women in their nervous complaints with *Ign.* when they take on complaints that are similar to such symptoms as come in hysteria.

- The hysterical diathesis is one that is very singular and difficult to comprehend.

- But a woman, when overwrought and overexcited and emotional, will do things that she herself cannot account for.

- She will do things as if she were crazy in her excitement.
